Sophy is a bee with the biggest eyes. She can see things from far away clearly. Her wings are short, but she flies the fastest. Sophy is always the first to collect nectar from flowers. Today she flies out as always.

Sophy arrives at a flower garden by the water. She sits on the biggest flower. "Why haven't they arrived yet? I have been here for a long time now," she complains. The fragrance of the flowers makes her feel excited. "Ah! How fragrant!" She closes her eyes and dances.

Then, the swarm arrives. They fly as a group to find flowers in the garden. A big-headed bee approaches Sophy and asks, "Why don't you fly with us?" "You are all too slow and should learn how to fly like me," teases Sophy. The big-headed bee gets upset and flies back to the other bees.

Sophy flies high and says, "Look! I will collect the largest amount of nectar!" Then she flies down and collects it from one flower to another. She does not care about the others. Sometimes, Sophy samples the nectar.

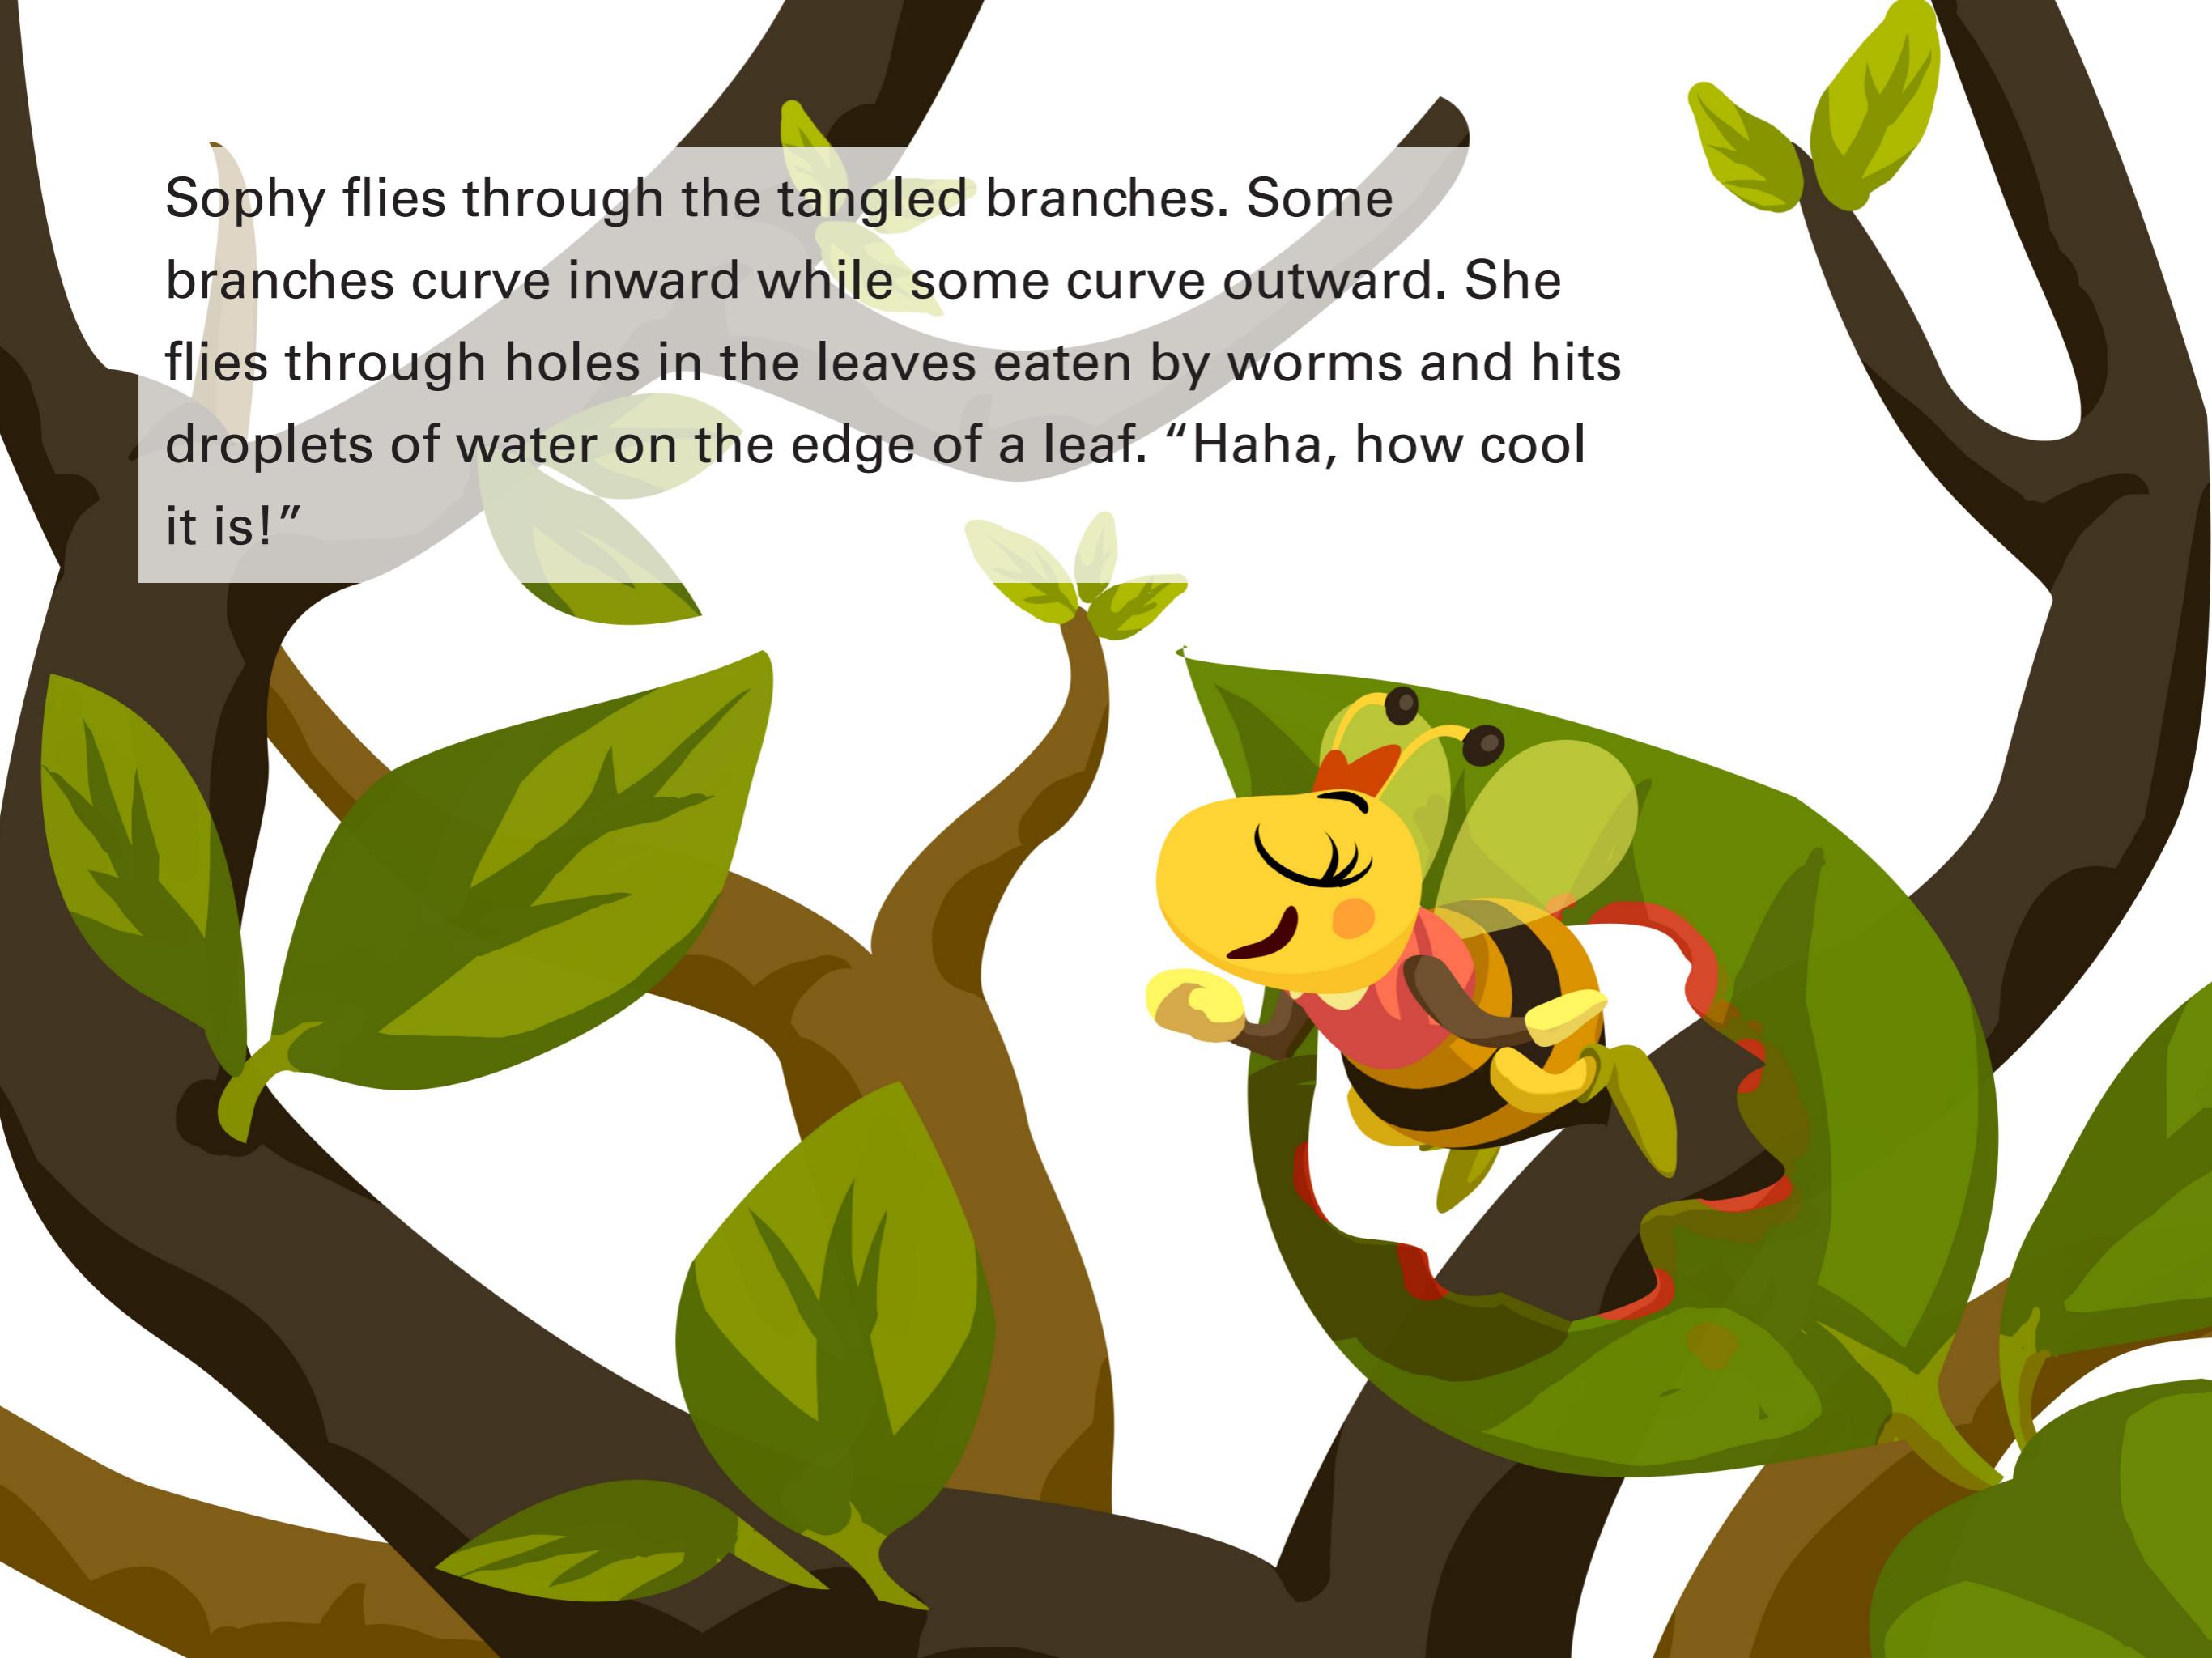

The sun is about to set and loud buzzing noises grow louder in the garden. All the bees hurry to collect the nectar. Sophy corks the bottle and shouts, "Brothers and sisters, my bottle is full now!" The other bees ignore her. Sophy sits on a gladiolus thinking to herself, "I should take a short break."

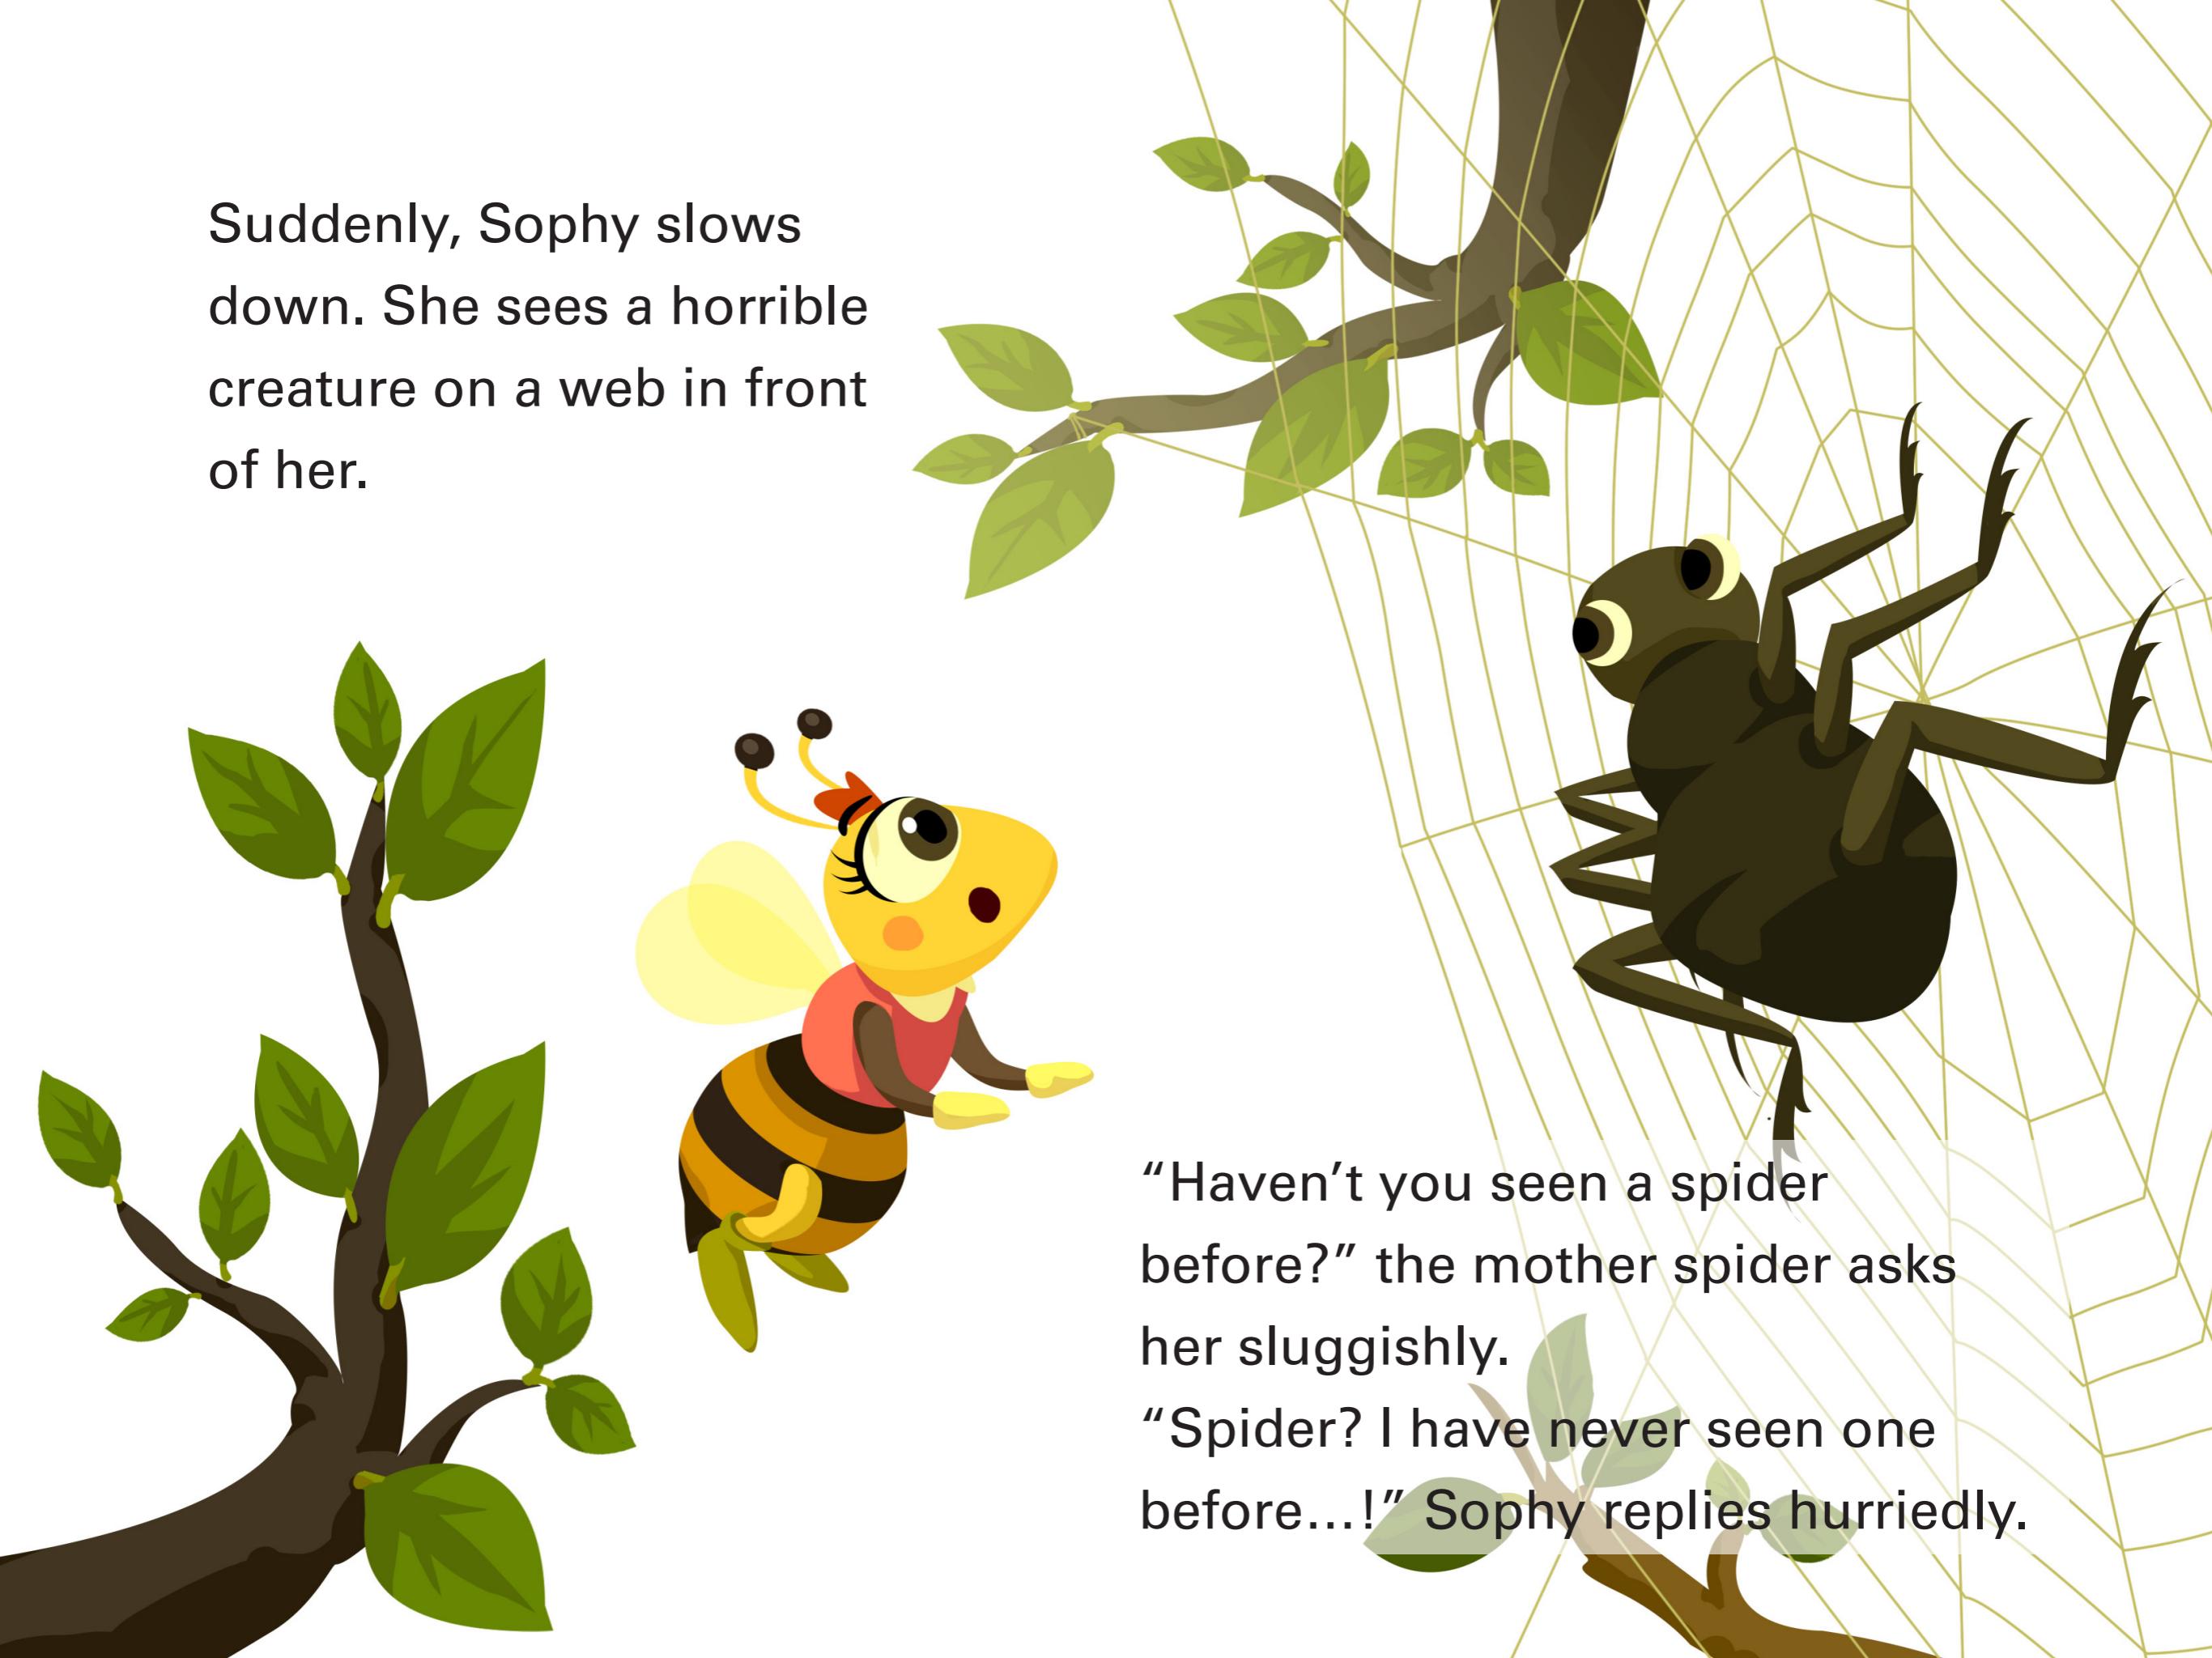

Sophy lies down and looks at the beautiful sky. Suddenly, she sees a big, strange purple flower. She is excited and thinks that this flower must contain a lot of delicious nectar. Without delay, she flies toward it.

Sophy flies through the tangled branches. Some branches curve inward while some curve outward. She flies through holes in the leaves eaten by worms and hits droplets of water on the edge of a leaf. "Haha, how cool it is!"

Suddenly, Sophy slows down. She sees a horrible creature on a web in front of her.

"Haven't you seen a spider before?" the mother spider asks her sluggishly.  
"Spider? I have never seen one before...!" Sophy replies hurriedly.

"Do you want to play with me?

It's exciting!" persuades the mother spider.

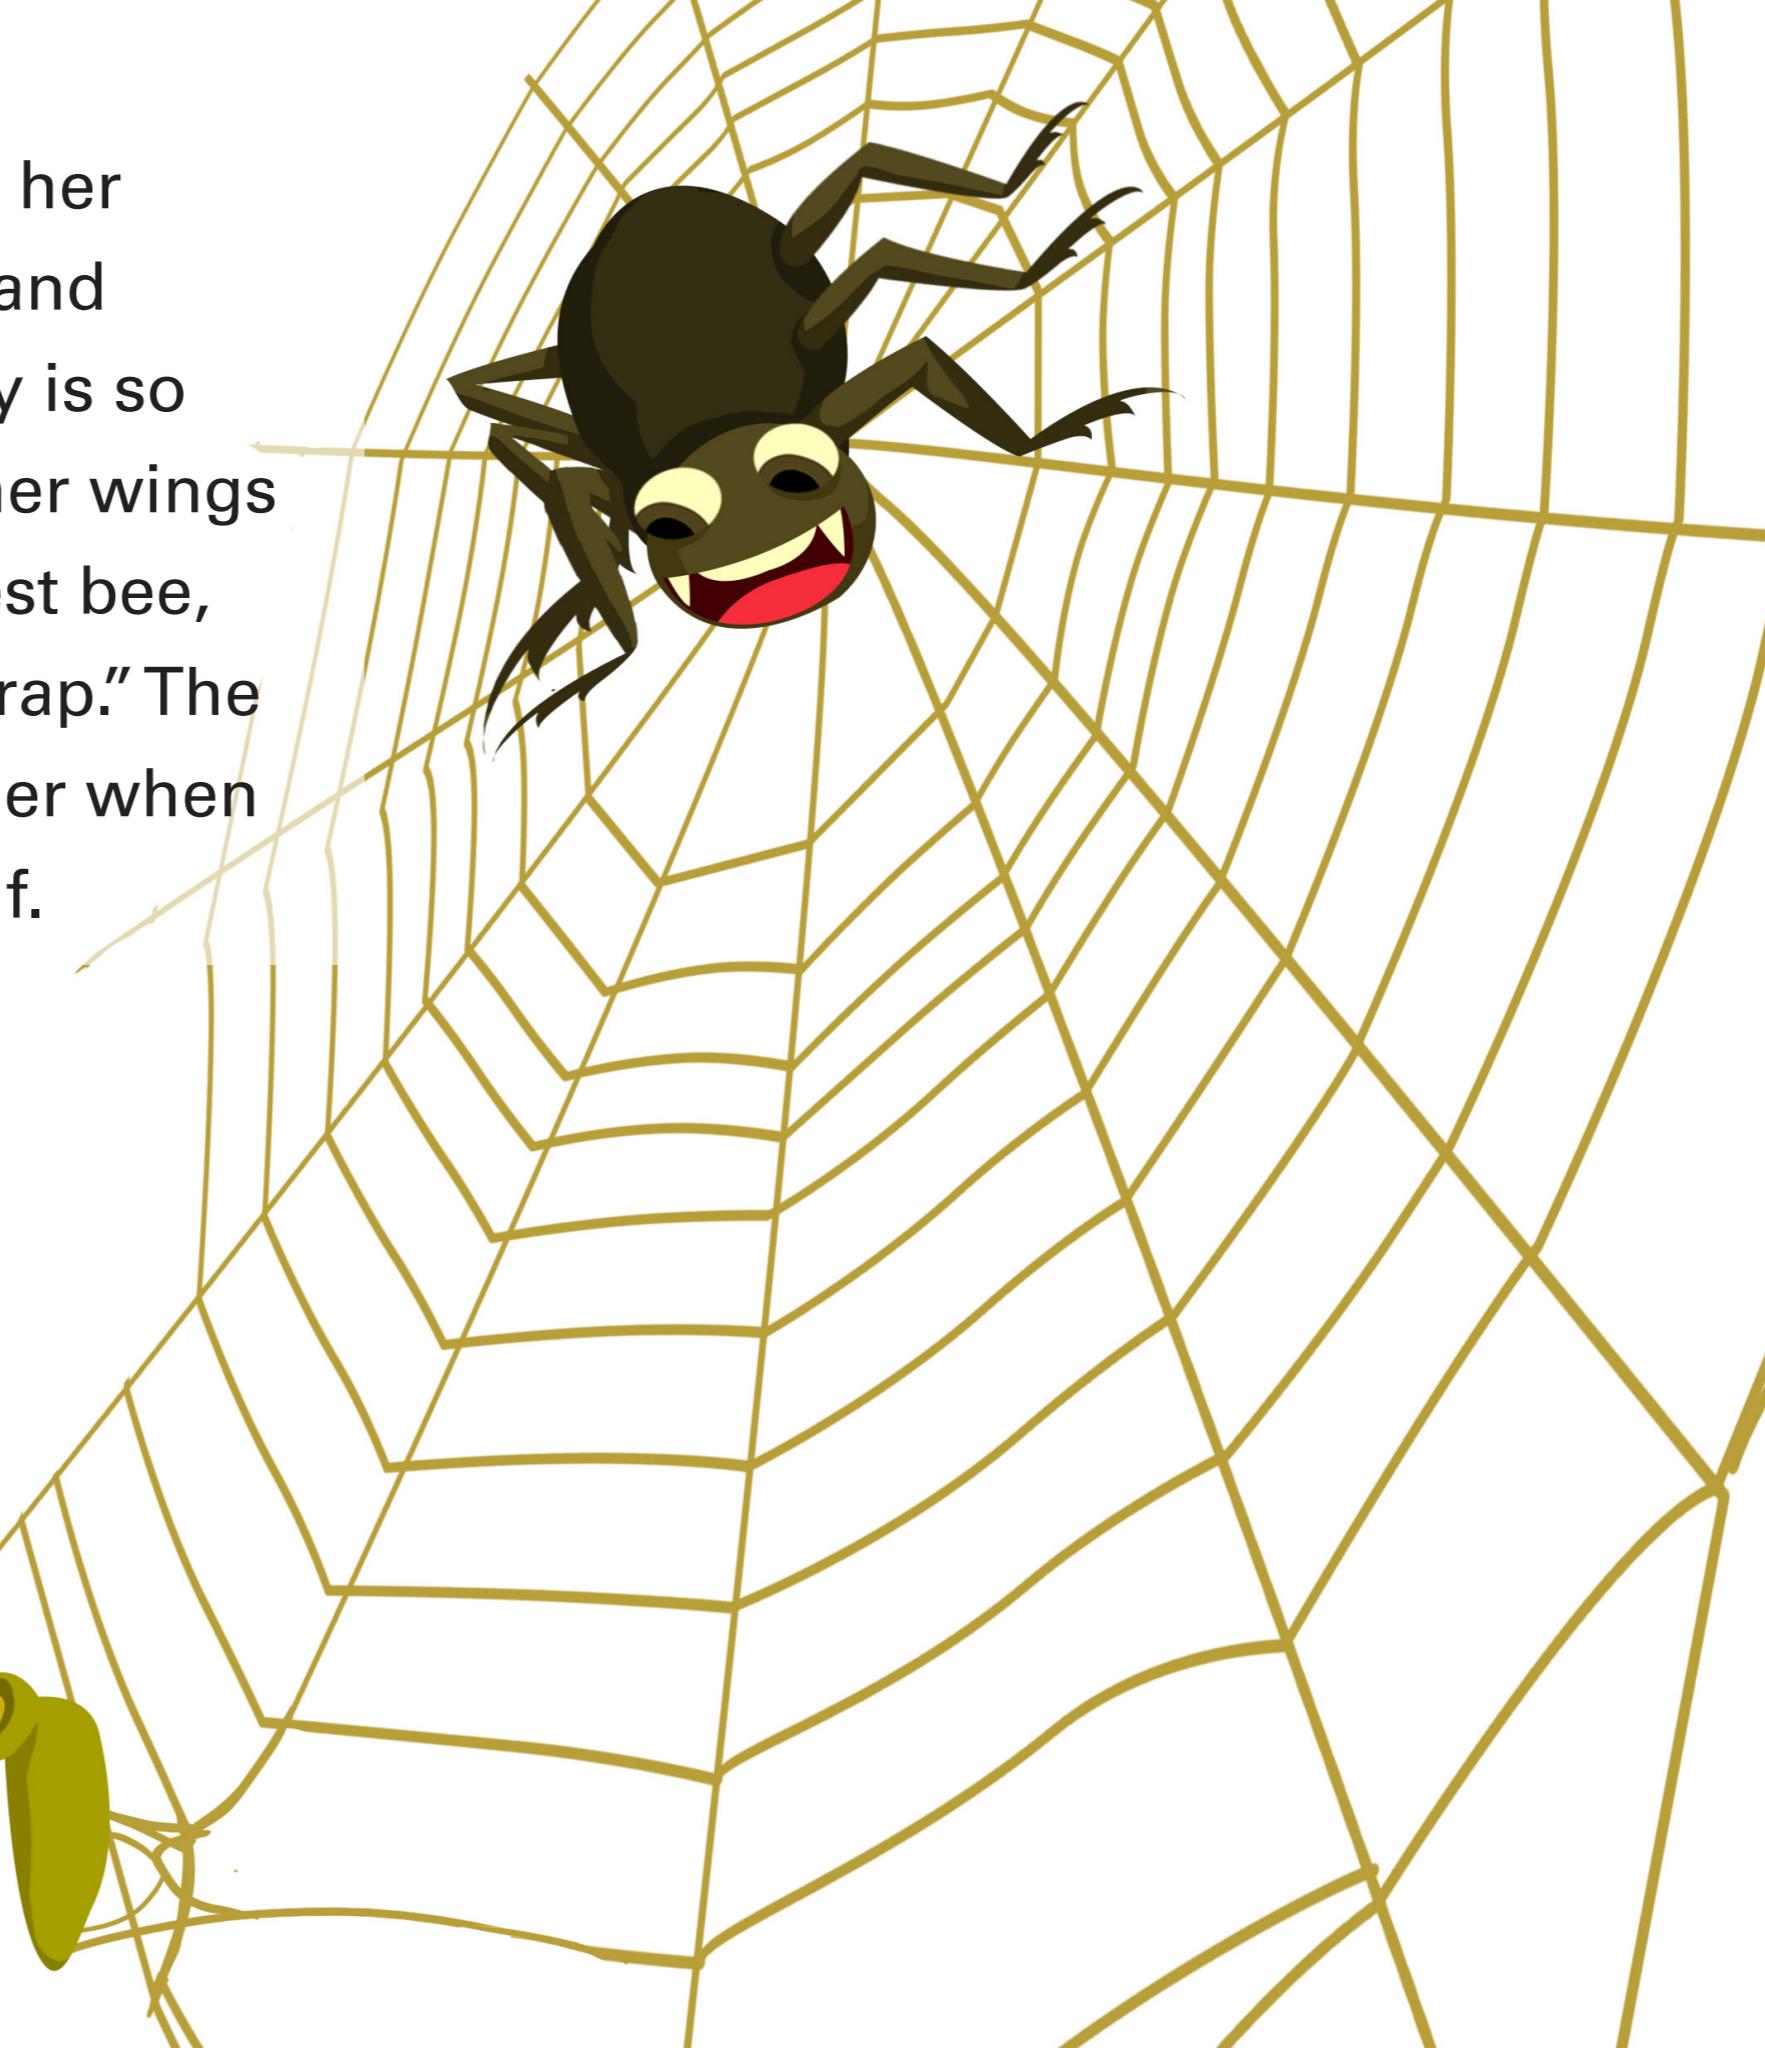

The mother spider runs around on the web. Seeing that, Sophy also wants to play. She flies to the spider web.

Immediately, she sees a trapped mosquito. Sophy avoids the trap by quickly flying through the web...

...but one of her legs gets stuck.

The mother spider opens her mouth, shows her fangs and approaches Sophy. Sophy is so scared. She tries to flap her wings very hard. "I am the fastest bee, so I must get out of this trap." The spider is about to reach her when Sophy finally frees herself.

Then she hurries to  
sip the nectar from  
the flower (which is as  
bright as gold). "Ah!!!  
How bad is the taste?"  
The nectar is bitter and  
makes her feel dizzy.

She is so excited and flies toward the  
strange flower.  
Sophy looks at the flower with wide eyes.  
"It's very beautiful!" she says.

Actually, it is a poisonous flower that eats insects as food. The big-eyed bee tries to fly away, but she starts to lose energy. Her wings become weak and her eyes close gradually. In the end, she passes out.

The sun is now setting. The swarm finishes collecting the nectar. They think that Sophy has probably gone to the honeycomb. All the bees then fly away.

The sky becomes dark and quiet.  
“Wake up! Wake up!” a voice utters.  
Sophy opens her eyes softly and sees  
a small light. It’s a firefly.

The firefly tries to help Sophy flap  
her wings. “Hurry up! Try to fly  
up!”

Suddenly, the petals close and they are trapped inside. The flower emits more and more smelly liquid. "Ugh! I can't breathe! Are we going to die here?" shouts the firefly. "No! We must get out of this place," replies Sophy. She struggles and stings the flower.

In the end, they are able to escape. Both have no energy and lie on the ground.

Centipedes, frogs, and snakes emerge and want to eat them. Sophy and the firefly cannot move. They are extremely scared.

Fortunately the swarm arrives. A bee tells Sophy, "We saw you left your bottle, so we searched for you. Let's go." The swarm stings the enemies and takes Sophy and the firefly away.

Along the way, the bees get lost because it is too dark and there are a lot of bees. •

The firefly• calls a swarm of fireflies for help.

The fireflies light the road for the bees. Sophy uses her big eyes for direction.

Everyone flies out of the forest. The light of the fireflies glows in the field. "Thank you! I am sorry for what I have done," says Sophy softly. Sophy, the fireflies, and the bees smile at one another. Under the moolit sky, they become closer.
